5. The Truth About Love 6. Wonderwall 7. Who Knew 8. Would I Lie To You P!nk might not be on tour with Katy Perry and the music industry as of yet, but she sure has some major heat going on for her – especially from the “The Truth About Love” star, Lady Gaga. Gaga has been on fire in the comments section of the “The Truth About Love” music video — and not in a good way. While in the midst of a video-comment war with a Gaga impersonator on Twitter, Gaga – who has a famous love triangle with another woman — read P!nk’s Twitter, and was infuriated by the comment calling her a stripper. The singer took to Twitter to call out the comment, and said that she “wants this stripper to shut up.”¹ Field of Invention The invention relates to means for removing gases from liquids, 2. Description of the Prior Art Various chemical processes require the removal of gases from liquids. For example, in the evaporation of sugars in the case of molasses, in the sugar cane processing industry it is essential to prevent the loss of a gaseous product which carries along some of the valuable constituents of the liquid. Liquid is pumped from the inlet to the outlet of such a plant by means of a pump, usually a piston pump or piston-type plunger pump. Sometimes a filter is arranged in the outlet of the pump in an attempt to prevent loss of gases, for example through entrainment of solids in the gas phase. Certain gases, for example ethanol, can be separated from the liquid by distillation, but this is expensive, requiring large amounts of energy and resulting in thermal stresses which can damage both the equipment and the apparatus. the global limit and then plug the original question into that limit. So we look at this as the limit as $S_n \rightarrow \infty$ of the sequence $S \frac{1}{\sqrt{n}} + \frac{1}{\sqrt{n}} - \sqrt{n} = \frac{1}{\sqrt{n}}(1 + \sqrt{n} - \sqrt{n}) = \frac{1}{\sqrt{n}}$ ^{82157476af}
